NIRMAAN PIPES

Piping the road to Growth

A Unit of Sitaram
Group of Companies

Features

'T' Ring TM

Specially designed 'O' ring that provides cushioning effect to the coupler making installation easier & damage free. The ring also serves to provide a leak free joint and absorb the vibration of the pump.

U MEP TM Technology

Developed using Ultra Molecularly Enhanced Polymer Technology, an Ultra hi-tech process that orients the PVC molecules both in the axial & circumferential directions resulting in a pipe with enhanced impact strength & flexibility.

Power Lock TM

Nirmaan Column pipes are fitted with non metallic Power Lock system. This provides extra safety to system during pump operations.

Square Thread

Square Thread are made using high quality CNC machines ensuring accurate threads. This provides high load bearing capacity.
